The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Disposition of Claims					
4) Claim(s) 1-14 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 1-14 is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement.					
Application Papers					
9)☐ The specification is objected to by the Examiner.					
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).					
11)☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.					
Priority under 35 U.S.C. § 119					
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 					
Attachment(s) 1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO/SB/08) Paper No(s)/Mail Date 1/15/2006. 4) Interview Summary (PTO-413) Paper No(s)/Mail Date 5) Notice of Informal Patent Application Other:					

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shver in view of Satchell, Jr et al. Shver teaches a burner/lance arrangement in the figures for example, with a hollow body, an internal tube or pipe for injecting oxygen and a flame shroud from a second surrounding pipe with separate openings from it's burner portion and a head with at least one nozzle where the burner/lance is employed for injecting oxygen with high velocity (see paragraph [0063] for example). Shver further discloses a particle injector for injecting carbon set underneath the burner (see fig. 10 and paragraph [0066] for example), thereby showing all aspects of the above claims except the use of a Laval (converging/diverging) shaped nozzle with an oblong cross section of various recited configurations or the use of three injectors for injection of gas rather than the single injector of Shver. Satchell, Jr. et al teaches that for the operation of a burner lance within a furnace environment at high velocities, in order to improve burner and combustion properties and control, it was known in the art at the time the invention was made to employ a Laval type nozzle with an oblong cross section (see the claims for example). Absent any demonstrated new or unexpected results shown to arise therefrom, motivation to alter the configuration of such a Laval nozzle with a general oblong cross section to any equally useful configuration within these broad requirements would have been a modification obvious to one of Art Unit: 1793

ordinary skill in the art at the time the invention was made since it has been well settled that alteration of the shape or configuration of a component without materially altering it's operation would have been an obvious modification (see MPEP 2144.04 IV C). Further, use of a plurality of injectors rather than the single injector disclosed by Shver in order to increase the delivered gas would also have been a obvious modification to one of ordinary skill in the art at the time the invention was made since multiplication of a part in order to multiply the part's effect has also been held to be an obvious modification (see MPEP 2144.04 VI B). Since Shver specifically desires the production of a high velocity flame with a controlled configuration, motivation to employ the nozzle structure disclosed by Satchell, Jr. et al of Laval shape with an oblong cross section as the nozzle of Shver would have been a modification obvious to one of ordinary skill in the art at the time the invention was made.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Kastler whose telephone number is (571) 272-1243. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on (571) 272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
